

Don't get caught in the rain

Ten Reasons You Should Order Your Contact Lenses From Us – **“Umbrella of Care”**

1. Contact lenses are a foreign material inserted into your eye and should be monitored to ensure that your eyes are receiving the best care possible.
2. Accuracy of fit is important to us. We order **our** patients the exact lenses that we prescribed for them. We will not substitute lenses of a lesser quality.
3. If the prescription has not expired, we give **our** patients one pair of emergency sample contact lenses to wear while their contact lens supply is on order.
4. We see **our** patients for contact lens related emergencies after hours and sometimes on the weekends for visits as simple as a lost contact lens.
5. We price **our** contact lenses as fairly and economically as possible so that **our** patients can get through the recent hard economic times. We will also match, within reason, any competitor's prices.
6. If your prescription changes the following year, opened and unopened boxes can be exchanged for your new prescription.
7. When you purchase your contacts from our office, you get to speak to a caring professional instead of an automated computer system.
8. You can “Test Drive” your contact lenses before committing to them.
9. We offer great eyeglass specials for **our** contact lens wearers.
10. We need you to “completely” support us so that we can continue being here for you!
